Summary

Web application developer with multi year experience in developing applications using .NET and cutting edge modern front end technologies and frameworks (e.g. VueJs, ES6 Javascript, HTML5, CSS3). Keen interest in the implementation of the latest browser/ front end features to create the best possible interfaces and experience for users as the web evolves.

Skills

- C# , .Net Core/ .NET framework / Entity framework
- ES6 Javascript
- HTML /CSS3
- Modern Javascript frameworks (Proficient in Vue Js, have completed projects using Angular, and Angular JS. Knowledge of React with JSX).
- Development and release (to app store) of iOS (Using fastlane and testflight) and Android applications built with Cordova
- Proficient knowledge of Progressive web app (PWA) development.
- AWS services (Including but not limited to s3, lambda, and coginto).
- Use of testing frameworks in both front end and back end development (Nunit, Jest, Nightwatch)
- Using GIT
- Knowledge of REST API design
- Communication / Working in a team and with project managers using Jira
- Use of Webpack and Babel to ensure browser compatibility

Work

Big Jump Limited (September 2016 – January 2019) – Bromsgrove, Worcestershire

At Big Jump Limited I worked on a range of projects for high profile clients particularly in the automotive and mobile communications industries. I worked on implementing interactive designs using modern front end technologies and frameworks (HTML/CSS and Javascript frameworks such as Vue js) and creating and then integrating with .Net core APIs or other services such as Amazon Web Services. I was also tasked with maintaining a number of existing .NET framework MVC sites for clients.

- Working on a project which lead to the release of an application in the Apple app store, and Google play store.
- Main contributor to front end Vue.js application used in a product adopted by several high profile clients.
- Researched and implemented new technologies in both new applications and to improve existing applications for our clients.

Github

My public github can be found at <https://github.com/TomF46> this contains two sample projects I have created. Please view the ReadMe.md files for further technical information about each project.

Education

University of Worcester
Computing BSc (Hons)
2:1 (Upper second class honors)
